

A Step-By-Step Buying Guide

How to buy Voodoo Token?

To buy Voodoo on PulseChain, you can follow these steps:

1. Set up a Wallet: Ensure you have a compatible wallet like MetaMask, available as a browser extension or mobile app. Install and create an account.
2. Acquire Pulse (PULSE): Obtain Pulse tokens through the PulseChain token sale or supported exchanges.
3. Connect your Wallet: Open your wallet (e.g., MetaMask) and connect it to the PulseChain network by selecting PulseChain as the active network.
4. Navigate to PulseX: Access PulseX, the decentralized exchange (DEX) on PulseChain, to trade Pulse for Voodoo tokens.
5. Add Voodoo Token: If the Voodoo token is not automatically displayed, manually add it to your wallet using the contract address: `0x1c5f8e8e84acc71650f7a627cfa5b24b80f44f00`.
6. Swap Pulse for Voodoo: Select the Voodoo token on PulseX, specify the amount of Pulse to swap, and approve the transaction.
7. Confirm and Execute the Swap: Double-check the transaction details and confirm the swap in your wallet. The Voodoo tokens will be transferred to your wallet on the PulseChain network.
8. Verify Transaction and Voodoo Balance: Check your wallet's transaction history to verify the completed transaction. Ensure that your wallet's token balance reflects the purchased amount of Voodoo tokens.
