

Tokenomics

Poison Reward Token Tokenomics

Let's explore how we've divided the 100% token ownership to create a vibrant ecosystem

1. To ensure a fair distribution of resources, we allocate a significant portion, let's say 40% of the tokens, as rewards for stakers of Voodoo tokens. This incentivizes users to stake their Voodoo tokens and earn rewards in Poison Reward Tokens.
2. To maintain liquidity and a healthy market, we reserve 30% of the tokens for creating and managing a liquidity pool. This enables seamless trading and enhances market stability.
3. Supporting our project's growth, we allocate 20% of the tokens to ongoing development, upgrades, and innovation. This helps us continuously improve the ecosystem and offer exciting features.
4. The founder behind this project is crucial to its success. We recognize and appreciate the significant role played in driving this venture forward.
5. To honor these important contributions, a special allocation of 5% of the tokens has been made exclusively for the founder. This allocation serves as a way to acknowledge their expertise and dedication, ensuring a fair reward for their hard work and commitment.
6. Finally, we dedicate 5% of the tokens to community initiatives. This includes partnerships, marketing campaigns, and community rewards, fostering engagement and growth.

With this well-balanced tokenomics structure, we create a thriving ecosystem where stakers are rewarded, liquidity is ensured, development is supported, and the community flourishes. Join us in the exciting world of the Poison Reward Token, where everyone has a stake in the success of our ecosystem.
